Prot. n. 5355 del 19/11/2026

CALL FOR APPLICATIONS FOR ADMISSION TO THE AFAM PhD PROGRAMME DESIGN AND DIGITAL TECHNOLOGIES FOR CULTURAL HERITAGE

XLII national cycle · III AFAM cycle · academic year 2026/2027

Programme code DOT26HKJET

PLACES AVAILABLE	SCHOLARSHIP AMOUNT	DURATION
2, both with a scholarship	EUR 16,243.00 gross per year for each scholarship, subject to statutory updates	3 years (36 months)

Two places in total, both with a three-year scholarship.

THE DIRECTOR

HAVING REGARD TO Law No. 508 of 21 December 1999, as subsequently amended;

HAVING REGARD TO Presidential Decree No. 132 of 28 February 2003, issuing the Regulations on the criteria for the exercise of statutory autonomy by institutions of Higher Education in Art, Music and Dance (AFAM);

HAVING REGARD TO the Statute of ISIA Pescara, approved by MIUR Director's Decree No. 3498 of 21 December 2016 and most recently amended by MUR Director's Decree No. 1843 of 6 November 2023;

HAVING REGARD TO Presidential Decree No. 212 of 8 July 2005, as amended by Presidential Decree No. 82 of 24 April 2024;

HAVING REGARD TO Ministerial Decree No. 470 of 21 February 2024, governing the accreditation of AFAM PhD programmes;

HAVING REGARD TO Ministerial Decree No. 778 of 12 June 2024, setting out the Guidelines for the accreditation of AFAM PhD programmes;

HAVING REGARD TO Ministerial Decree No. 544 of 27 March 2024, concerning the amount of AFAM PhD scholarships;

HAVING REGARD TO Ministerial Decree No. 927 of 26 June 2026, concerning the allocation of funding for AFAM PhD scholarships for 2026–2031;

HAVING REGARD TO Ministerial Decree No. 1361 of 28 October 2026, granting accreditation to the "Design and Digital Technologies for Cultural Heritage" programme (DOT26HKJET), based at ISIA Pescara, with effect from the 2026/2027 cycle (XLII cycle);

HAVING REGARD TO the Institute's General Academic Regulations and internal provisions on PhD programmes, adopted by Director's Decree No. 2890/A2 of 12 July 2024;

HAVING REGARD TO the resolutions of the competent bodies concerning the establishment of the programme and the funding of the scholarships (Board of Directors Resolution No. 57 of 29 July 2026, and the Academic Council Resolution of 29 July 2026 under item 3 of the agenda);

HAVING OBTAINED confirmation of financial coverage for the two scholarships and the associated costs, and for research and mobility activities (resolutions approving the 2026 Budget, No. 21 of 2 April 2026, and the 2027 Budget, No. 71 of 26 October 2026);

Prot. n. 5355 del 19/11/2026

HEREBY DECREES

Art. 1 — Call for applications and number of places

A public selection procedure based on qualifications, a research proposal and an interview is hereby announced for admission to the AFAM PhD programme "Design and Digital Technologies for Cultural Heritage", code DOT26HKJET, for the academic year 2026/2027.
Only 2 (two) places are available, both supported by a three-year scholarship. Scholarships are awarded according to the final merit ranking. No additional places are available.

Art. 2 — Administrative seat, duration and objectives of the programme

The administrative seat of the programme is the Higher Institute for Artistic Industries (ISIA) in Pescara. The programme lasts three years and is full-time. It is provisionally expected to begin in January 2027. The official start date of the programme and the associated scholarships will be determined by a subsequent decision of the Institute, published on its institutional website and notified to successful applicants before the enrolment deadline. The programme lasts thirty-six months from the date so determined, subject to the cases of suspension and extension provided for by the legislation in force.
The PhD programme promotes interdisciplinary research into design methodologies and digital technologies applied to the study, documentation, conservation, interpretation, accessibility and enhancement of tangible and intangible cultural heritage. Training and research activities are carried out in accordance with the accredited programme proposal and the programme description in Annex A.
Within the scope of the accredited programme proposal, the Doctoral Board defines each doctoral student's individual training plan and appoints at least one supervisor, in accordance with Ministerial Decree No. 470/2024.
The proposal submitted with the application forms the basis for the individual research project. It may be refined with the supervisor and approved by the Doctoral Board, in accordance with the aims and content of the accredited programme.

Art. 3 — Admission requirements

Applications are open, without restrictions on nationality or age, to holders of a second-cycle academic diploma, an academic diploma awarded under the former system together with an upper secondary school leaving qualification, a Master's degree (laurea magistrale), or a foreign qualification of a comparable level (EQF 7), pursuant to Article 7(1) of Ministerial Decree No. 470/2024. Specialist degrees (laurea specialistica) and university degrees awarded under the previous university system are also accepted where their equivalence is provided for by the legislation in force.
Applicants who will obtain the required qualification by the date set for enrolment may also be admitted conditionally. Failure to obtain the qualification by that deadline results in the loss of the right to admission.
The suitability of qualifications awarded abroad is assessed by the Selection Committee solely for the purpose of admission, in accordance with the legislation in force and the applicable international agreements.

Art. 4 — Scholarships and funding of places

Both places offered under this call are funded by scholarships. At the date of issue of this call, the minimum annual scholarship amount is EUR 16,243.00, before deduction of the recipient's social security contributions, pursuant to Ministerial Decree No. 544/2024, subject to subsequent statutory adjustments.

The scholarship is paid in monthly instalments in accordance with the Institute's administrative and accounting procedures. It is subject to contributions to the INPS separate social security scheme (Gestione separata), as required by law.

The scholarship is awarded for three years and is renewed annually, subject to a positive assessment by the Doctoral Board of the completion of the activities planned for each year. Financial coverage is provided by ministerial funds and/or other resources formally allocated for this purpose, in accordance with the Institute's official decisions.

Art. 5 — Application deadline and submission procedure

Applications and all required supporting documents must be submitted through the channels specified in this article and received **no later than 11:59 p.m. (Italian time) on 19 December 2026**, failing which the application will be excluded from the selection procedure. The deadline may be extended depending on when the publication requirements under the applicable regulations have been fully completed. Any extension will be announced through an official notice on the institution website. If the deadline falls on a public holiday, it will automatically be extended to 11:59 p.m. on the next non-public holiday.

Submission from a personal certified email account (PEC). The application and its attachments must be sent to **pec@pec.isiadesign.pe.it**, exclusively from a certified email account registered in the applicant's own name. PEC accounts registered to third parties may not be used.

Alternative for applicants residing abroad without a personal PEC account. Applicants residing abroad, regardless of nationality, who do not have a personal PEC account may send the application and its attachments from a personal ordinary email address to **isiape@isiadesign.pe.it**, by the same deadline. In Annex B, they must declare their residence abroad, the absence of a personal PEC account and the email address used, which will serve as their contact address for individual communications.

Signature and format. The application and any documents requiring a signature must be signed by hand and submitted as scanned copies, or signed with a digital signature or another valid electronic signature. A copy of a valid identity document or passport must be attached. Other methods of valid submission provided for by Article 65 of Legislative Decree No. 82 of 7 March 2005 remain applicable, subject to the submission channels specified here. The application, CV, proposal and lists must be submitted in PDF format, including digitally signed PDFs; the technical instructions set out below apply to other materials.

The email must bear the following subject line: "Domanda di ammissione al dottorato DOT26HKJET – a.a. 2026/2027 – Cognome e nome" ("Application for admission to the PhD programme DOT26HKJET – academic year 2026/2027 – Surname and first name"). The applicant must retain a copy of the email, its attachments and any available receipts.

Verification of compliance with the deadline. For submissions by PEC, the date and time shown on the receipt confirming delivery to the Institute's mailbox are authoritative; the acceptance receipt alone does not confirm delivery. For submissions by ordinary email permitted under this Article, the date and time of receipt in the Institute's mailbox, as recorded by its email system, are authoritative.

For applications permitted to be submitted by ordinary email, the Institute will send an acknowledgement of receipt. The date on which this acknowledgement is sent and the subsequent entry in the Institute's official register do not affect whether the application was submitted on time, which is determined by receipt before the deadline. The acknowledgement does not confirm admission to the selection procedure.

The application, CV, research proposal, lists and documentation concerning the admission qualification must be submitted as legible PDF files that are not password-protected. Digitally signed PDFs, including files with the ".pdf.p7m" extension, are also accepted. The signature requirements set out in this Article remain applicable.

The total size of the files attached to the application must not exceed **10 MB**. The application and its attachments must be received by the submission deadline and in accordance with the receipt criteria set out in this Article. Optional qualifications and outputs submitted after the deadline will not be assessed; their late submission does not affect the admissibility of an application already submitted validly and on time, subject to the verification provided for in Article 7.

For publications, works, portfolios and other outputs referred to in Article 6(f), stable links may be provided in the list of qualifications and outputs. The materials must be identifiable and accessible to the Selection Committee by the application deadline and throughout the selection procedure, in accordance with Article 6. The application, identity document, CV, research proposal and required documentation concerning the admission qualification must be attached to the emails.

For information and assistance with submitting applications, applicants may use the contact details given in Article 18. A request for assistance does not replace submission of the application and does not suspend or extend the deadline. This is without prejudice to any measures adopted by the Institute in the event of documented malfunctions of its receiving systems and published on its institutional website. Incomplete or late submissions and any rectification of irregularities are governed by Article 7.

Participation in the selection procedure is free of charge and no application fee is payable.

Art. 6 — Documents to be attached to the application

Applicants must submit the following documents, which must be legible and identifiable by their surname and first name:

a) Application form and declarations. Annex B, completed in the relevant sections, dated and signed in accordance with Article 5, including personal details, contact information and the declarations required to apply.

b) Identity document. A legible copy, front and back where relevant, of a valid identity document; for a passport, copies of the pages containing personal details and validity information are sufficient.

c) Curriculum vitae. A CV covering education, training, and scientific and artistic activities, **in European format (Europass), dated and signed**, describing the applicant's education and training, relevant research, artistic, design and professional activities, and skills relevant to the programme. For the main experiences, the period, institution or organisation concerned and role held must be stated.

d) Admission qualification. Information on the qualification required for admission, to be provided in Section 2 of Annex B, and the supporting documentation in the cases specified below. Template D1 in Annex D may be used for additional information or clarification, without repeating information already provided.

e) Research proposal. A proposal prepared in accordance with the guidelines in Annex C, consistent with the programme, written in Italian or English, and no longer than five pages, including figures, diagrams and tables, but excluding the cover page and bibliography. The proposal must state the applicant's name and the title of the proposed research.

f) Optional qualifications and outputs for assessment. A numbered, dated and signed list of publications, works, portfolios, research outputs and other relevant qualifications for which assessment is requested, with the corresponding documents or stable links. The absence of such additional qualifications or outputs does not prevent participation or render the application incomplete.

Information on the admission qualification. For a qualification already obtained, the applicant must state the awarding institution and country, the name of the qualification, the award date and, where applicable, the final grade. Holders of an academic diploma awarded under the former system must also state their upper secondary school leaving qualification. Applicants conditionally admitted under Article 3 must state the institution, programme of study and expected completion date, attaching the documentation of their studies available by the application deadline. Completion of the qualification must be documented by the deadline set for enrolment.

Information on qualifications and examinations passed must be provided by self-declaration in the cases and within the limits permitted by Articles 3 and 46 of Presidential Decree No. 445/2000, without the need to produce certificates for information that may be declared in this way. For the academic assessment of foreign qualifications, the documentation specified in the following paragraph is still required.

For qualifications obtained or to be obtained abroad, applicants must request in their application an assessment of suitability solely for admission purposes and attach a copy of the qualification, if already obtained, together with documentation useful for assessing its level and content, such as a transcript of examinations or a Diploma Supplement, where available. Documents must be submitted in Italian or English; documents in another language must be accompanied by a translation into Italian or English. The Institute may require successful applicants to provide further documentation and any official translations necessary to verify the qualification, in accordance with the applicable legislation.

How to prepare the list of qualifications and outputs. For each item under point (f), state: sequential number; type; title or brief description; year or date; authors and the applicant's role or personal contribution, where relevant; institution, publisher or presentation venue, if applicable; and the name of the attached file or a stable link to the material. DOI, ISBN and other identifiers must be given where available. A portfolio may contain several works,

provided each is identifiable and the applicant's contribution is specified. The list may be prepared using Template D2 in Annex D.
Links must allow the Selection Committee to identify and consult the submitted materials, which must be available by the application deadline and remain accessible throughout the selection procedure. For content that can be updated, the version or date of the material submitted for assessment must be specified. Changes or additions after the deadline may not introduce new qualifications or outputs for assessment; any clarification or rectification of irregularities is governed by Article 7.
Templates D1 and D2 in Annex D are **optional**: a different format containing the same relevant information is accepted, and failure to use these templates is not a ground for exclusion. The templates facilitate preparation of the documentation and do not introduce additional categories of assessable qualifications or alter the criteria and scores set out in Article 9.
Applicants' declarations are subject to verification under Presidential Decree No. 445/2000, within the applicable limits; foreign documentation is assessed in accordance with the relevant provisions.

Art. 7 — Verification of applications and admission to the procedure

The Administration checks the formal validity of applications and may admit applicants subject to verification of the admission requirements. Where irregularities can be remedied, applicants may be asked to provide supplementary information within the time limits and in the manner communicated by the Institute, in accordance with the principle of equal treatment.
Rectification may concern formal irregularities and clarification of documentation submitted on time. It may not involve late submission of the research proposal, substantial changes to it, or the addition of new qualifications or outputs for assessment after the deadline. Subsequent completion and documentation of the admission qualification remain permitted in the cases provided for in Article 3.
Failure to obtain the required qualification within the time limits set out in Article 3, submission after the deadline, or failure to provide essential elements where the omission cannot be remedied will result in exclusion by a reasoned decision.

Art. 8 — Selection Committee

The Selection Committee is appointed by a decision of the Director, in accordance with the applicable legislation and the Institute's Academic Regulations, pursuant to Article 48. Its membership must ensure appropriate qualifications and expertise consistent with the subject areas of the PhD programme.
The appointment decision and the membership of the Selection Committee will be published on the page dedicated to the procedure before assessments begin.
Before assessing applications, the Selection Committee defines and records in its minutes any detailed criteria within the scope of the scores and parameters established by this call, and arranges for their publication on the page dedicated to the procedure. No new requirements, admission thresholds or grounds for exclusion may be introduced. Impartiality, transparency and the management of conflicts of interest must be ensured.

Art. 9 — Selection stages and assessment criteria

The selection procedure comprises: assessment of qualifications and the CV (maximum 20 points), assessment of the research proposal (maximum 40 points), and an interview (maximum 40 points). The maximum total score is 100 points. There is no separate written test.

The assessment criteria are: for qualifications, the relevance and quality of education and training and of research experience and outputs; for the proposal, originality, methodological rigour, feasibility within three years and consistency with the programme's aims; for the interview, command of the subject matter, critical and design skills, motivation, and the ability to discuss the proposal from an international perspective.

Applicants are deemed to have passed the selection if they obtain at least 60/100 overall and at least 24/40 in the interview.

The Selection Committee first verifies the relevance of the proposal to the programme's aims. Submission of a proposal that is manifestly unrelated to those aims results in exclusion from the selection procedure by a reasoned decision. A finding that the proposal is of insufficient quality affects the score awarded and does not, in itself, constitute a ground for exclusion.

All applicants duly admitted to the procedure and not excluded because their proposal is manifestly unrelated to the programme's aims are admitted to the interview. There is no separate numerical threshold in the preliminary assessment of qualifications and the research proposal.

The results of the assessment of qualifications, the CV and the research proposal will be published on the page dedicated to the procedure at least three working days before the interviews begin, showing the scores awarded for each component separately.

Art. 10 — Interview in Italian and schedule

The interview is conducted exclusively in Italian, including where the proposal is written in English, and consists of a discussion of the research proposal and the applicant's experience and skills. The academic discussion also establishes whether the applicant has the command of Italian needed to take part in the interview.

The schedule, venue or link for a remote interview, and operational instructions will be published on the institutional website www.isiadesign.pe.it at least twenty days in advance. The interview is public; the notice specifies how the public may attend, including where interviews take place online. Applicants must show a valid identity document.

The interview notice specifies how interviews will be conducted, any requirements and deadlines for requesting remote participation, and the necessary technical conditions, applying uniform criteria and respecting equal treatment. In the event of a technical interruption or inability to participate that can be substantiated and is not attributable to the applicant, the Selection Committee will arrange for the interview to continue or be rescheduled, by a reasoned decision and while safeguarding the regularity of the assessment. The arrangements adopted will be recorded in the minutes.

Failure to attend the interview constitutes withdrawal from the selection procedure, subject to the technical impediments covered by the preceding paragraph and any other mandatory statutory provisions.

Art. 11 — Ranking, scholarship awards and filling of vacancies

At the end of the selection procedure, the Selection Committee draws up the final ranking of applicants who have passed the selection in descending order of score, applying the criteria set out below in the event of a tie. The ranking is approved by a decision of the Director and published on the institutional website. The scores for qualifications and the CV, the proposal and the interview, the total score and the outcome of the assessment will be made public in compliance with personal data protection rules. The ranking identifies the two applicants admitted with a scholarship.

The first two applicants in the ranking who meet the requirements are admitted with a scholarship. In the event of withdrawal, forfeiture of a place or failure to enrol by the deadline, the place is offered to the next applicant in the ranking in accordance with the Institute's rules, solely to fill the two funded places.

The Institute will notify any offer of a place following a vacancy using the contact details declared by the applicant, stating how and by when the place must be accepted and enrolment completed in accordance with Article 12. If no suitable applicants are available, the place will remain unfilled. Filling vacancies from the ranking may not increase the number of places offered beyond two.

Without prejudice to any mandatory preferences established by the applicable legislation, where applicants have the same total score, priority is given to the applicant with the higher research proposal score; if the tie persists, priority is given to the applicant with the higher interview score. If the tie still persists, priority is given to the younger applicant. Any remaining tie is resolved by a public draw, the arrangements for which will be announced on the page dedicated to the procedure.

Art. 12 — Enrolment and acceptance of the place

Successful applicants, including those offered a place following a vacancy, must accept the place and complete enrolment within the time limit stated in the Institute's individual communication, which must allow at least three working days. The communication specifies the deadline date and time, set at 23:59 Italian time, the acceptance and enrolment procedures, the documentation required, and the start date of the programme and scholarship.

The communication is sent to the personal PEC address declared in the application or, for applicants permitted to use ordinary email under Article 5, to the personal email address declared. The time limit begins on the day following, respectively, delivery as evidenced by the PEC receipt or the sending of the ordinary email as recorded by the Institute. Applicants must monitor their declared contact address and promptly report any changes. For the purposes of this call, Saturdays, Sundays and public holidays are excluded when calculating working days.

Enrolment is completed by submitting the required documentation, including evidence of obtaining any qualification declared as pending, and by meeting the payment requirements set out below. Within this admission procedure, inability or refusal to accept a place with a scholarship does not entitle the applicant to a place without a scholarship.

Failure to complete enrolment within the prescribed time limit results in forfeiture of the place, which is then offered to the next applicant in the ranking. Successful applicants with a foreign

qualification must provide the documentation necessary for statutory checks; the applicable requirements concerning entry into and residence in Italy remain in force.
For this cycle, scholarship holders are not required to pay any enrolment or tuition fees to ISIA Pescara for the entire standard duration of the programme.
At enrolment, doctoral students are required to pay only EUR 156.00, consisting of EUR 140.00 for the ADSU regional student welfare tax and EUR 16.00 in stamp duty, subject to any exemptions provided for by the applicable legislation.
The enrolment instructions set out the payment methods and how receipts must be submitted. These instructions may not introduce fees in addition to those provided for in this call. Any regional tax and stamp duty obligations for enrolment in subsequent years are governed by the applicable legislation; no enrolment or tuition fees are payable to the Institute.

Art. 13 — Scholarship increase for research abroad and research budget

The doctoral programme normally includes, for each doctoral student, one or more periods of research and training at highly qualified institutions abroad, consistent with the programme's objectives and the individual research project. The host institution, duration and arrangements are defined and approved by the Doctoral Board when planning the doctoral student's activities, in accordance with the accredited programme proposal, the Institute's regulations and any conditions laid down in the funding instruments. The scholarship increase provided for in this Article applies to authorised periods of research abroad.
For periods of research abroad authorised in advance by the Doctoral Board, the scholarship is increased by 50% for a total period not exceeding twelve months over the three-year programme, except in the specific cases in which an extension is permitted by Ministerial Decree No. 470/2024.
From the first year and for each year of the programme, each doctoral student is guaranteed a budget for research activities in Italy and abroad of at least 10% of the annual scholarship amount referred to in Article 4, pursuant to Article 8(4) of Ministerial Decree No. 470/2024. Based on the amount of EUR 16,243.00, the minimum budget is EUR 1,624.30 per year. This budget is additional to the scholarship and the increase for periods abroad.
Activities, the allocation of funds and eligible expenditure must be authorised in advance and accounted for in accordance with internal procedures and the applicable funding rules. The research budget is not an automatic cash payment and may not be charged to the doctoral student.

Art. 14 — Doctoral students' obligations and compatibility

The PhD programme requires an exclusive, full-time commitment. Enrolled students must comply with the training plan, carry out research activities, take part in annual assessments, and observe the Institute's regulations and the rules on ethics, integrity and data protection.
Any paid work is subject to prior authorisation by the Doctoral Board, within the compatibility limits set by Article 11 of Ministerial Decree No. 470/2024 and the General Academic Regulations. Tutoring and supplementary teaching activities may be undertaken with the Doctoral Board's prior approval, in accordance with the approved training programme and the applicable rules; supplementary teaching remains subject to the maximum of forty hours per academic year laid down in Article 11(3) of Ministerial Decree No. 470/2024.

Applicants must declare in their application any previous PhD scholarships they have received and any other scholarships, benefits or forms of funding they currently hold, stating the provider, purpose and period of support. Any subsequent changes must be promptly reported to the Institute. Compatibility with the scholarship offered under this call is assessed on the basis of the applicable laws and regulations in force on the date of publication of the call and the conditions of the funding concerned. Where an incompatibility can be resolved by choosing between the benefits concerned, the applicant will be invited to make that choice within the time limit set by the Institute, in time to complete enrolment.

Any simultaneous enrolment in other programmes is governed by Law No. 33 of 12 April 2022 and its implementing measures, including Ministerial Decree No. 933/2022, subject to the prescribed conditions and compatibility with the attendance and research obligations of the PhD programme. Applicants must declare any other current enrolments in their application and report any changes.

Rights in research results, including written work, artistic works, software, models and datasets, are governed by the legislation in force, the applicable Institute regulations and any research agreements. Third-party rights, the authorisations required for the use of cultural heritage assets and associated images, and confidentiality obligations must be respected, in coordination with the submission and defence of the final work.

Art. 15 — Annual assessments, suspensions and extensions

Progression to subsequent years and renewal of the scholarship are subject to a positive assessment of the activities completed. To this end, doctoral students must submit a report on their training and research activities and the results achieved, in accordance with the procedures and deadlines set by the Doctoral Board and the Institute’s regulations. After receiving the supervisor’s assessment, the Doctoral Board decides on continuation of the programme and renewal of the scholarship.

Suspension, extension and discontinuation of the programme, and their financial consequences, are governed by Article 7 of Ministerial Decree No. 470/2024, mandatory statutory provisions and the regulations in force. Maternity, paternity and health protections remain applicable, including, in particular, the parental leave provisions in Article 11(7) of Ministerial Decree No. 470/2024.

Art. 16 — Final examination and degree

The doctoral degree (“Dott. Ric.” or “Ph.D.”) is awarded following a positive assessment of the final research work, which may consist of an artistic project or output accompanied by a methodological and scientific text, or a scientific output in the field of art and design, in accordance with Article 7 of Ministerial Decree No. 470/2024.

The final work is assessed by external reviewers and defended in public in accordance with the applicable legislation and the Institute’s Academic Regulations. Training activities are recorded in the Diploma Supplement.

Art. 17 — Personal data processing and equal opportunities

Applicants’ personal data are processed by ISIA Pescara under Regulation (EU) 2016/679 and the applicable national legislation, for purposes connected with this procedure and the resulting

administrative requirements. The full privacy notice, including details of the data controller, the Data Protection Officer and data subjects' rights, is published on the Institute's website.
The principle of non-discrimination is upheld and, where provided for, accommodations and assistance are available to applicants with disabilities or specific learning disorders (DSA). The application instructions, published together with this call, specify the procedure and deadlines for requesting such arrangements, the documentation required and the relevant contact details. The documentation is processed solely for the purpose of arranging the requested measures and with the safeguards required by personal data protection legislation.

Art. 18 — Publication, applicable provisions and officer responsible for the procedure

This call, drawn up in Italian and English, is published for at least 30 days on the ISIA Pescara website, the European EURAXESS portal and the Ministry's website, in accordance with Article 7(2) of Ministerial Decree No. 470/2024. The documents relating to the procedure and notices to applicants are published with the safeguards required by law.
The call is accompanied by the following annexes: **Annex A**, programme contents; **Annex B**, application form and applicant declarations; **Annex C**, research proposal guidelines; **Annex D**, optional templates for information on the admission qualification and the list of qualifications and outputs.
General notices, the schedule and the selection results are published on the page dedicated to the procedure at www.isiadesign.pe.it and constitute official notification to applicants. The individual communications provided for admission, enrolment and offers following vacancies remain applicable. Applicants must consult the page dedicated to the procedure and keep their declared contact details up to date.
Matters not covered by this call are governed by Ministerial Decree No. 470/2024, the ministerial provisions in force and the Institute's General Academic Regulations. Officer responsible for the procedure: Administrative Director, Dr Roberto D'Eramo. Information: isiape@isiadesign.pe.it.

THE DIRECTOR
Prof. Donatella Furia

Pursuant to Article 3, paragraph 2, of Legislative Decree 39/1993, Articles 7 and 7-bis, paragraph 4, of Legislative Decree 33/2013, and the guidelines issued by the Italian Data Protection Authority (Garante per la protezione dei dati personali), handwritten or digital signatures have been omitted from this copy intended for publication. Such signatures are duly present or recorded on the original document, which is kept in the institution's records.
